

30%

That's how much your municipal property taxes could increase over the next four years if Brian Johns becomes Mayor!

The Math

(and we're being conservative)

Inflation

10%

(2.5% a year x 4 years)

+

His promises

20%

(min 5% a year to deliver)

=

**TOTAL
Roughly**

30%

That's before any other issues that might come up over the 4-year term!

Where the Money Would Go

Promises to just about every interest group in EG!

No credible plan to pay for it

Where he says the money will come from:

- Hire outside consultants: Often cost taxpayers more than they save
- Seek sponsorships: Corporate money dries up in uncertain economic times
- Public-private partnerships (P3): Rarely benefit taxpayers (e.g., 407 ETR, Eglinton Crosstown, Ottawa LRT)

The Bottom Line

Out of touch creative accounting and sleight of hand won't find the money to pay for his many promises. The concept of eliminating waste and finding efficiencies to pay for promises is naive and just not realistic. *It's like saying you're going to build a new pool with the coins you find in the couch cushions.*

Anyone telling you he can implement all these promises without increasing your property taxes isn't being straight with you!

East Gwillimbury can't afford a blank cheque to pay for his promises!

WE CAN'T AFFORD FOUR YEARS OF BRIAN JOHNS!

**Why You
Should Vote**

Scott Crone *for* Mayor

Scott's platform is lean and fiscally responsible, affordable and disciplined.
It is focused on four campaign pillars:

- **AFFORDABILITY**
- **COMMUNITY SAFETY**
- **RESPONSIBLE GROWTH**
- **ECONOMIC DEVELOPMENT**

These commitments can be kept without putting EG's finances at risk and increasing the tax burden on our residents.

Scott's Affordability Commitments

- Strengthening EG's Economic Development to attract new businesses and **shift the tax burden** away from residential taxpayers.
- Reducing or waiving fees for dog licences and fire permits.
- Protecting EG's healthy reserves and our debt-free position.
- Fighting for the expansion of meaningful transit options for EG.
- Keeping recreation programming available to all age groups and expanding subsidized membership access.
- Working with our EG libraries to **expand lending offerings**, because libraries are affordability infrastructure.
- **Growth pays for growth**, developers not EG residents bear the costs of new infrastructure.

In uncertain economic times, prudence means restraining spending and not committing to anything we can't afford.
